🧩 Soft Skills

- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking

🧩 TECH SKILLS

- **Programming Languages**: Java, JavaScript, C, C++,Python
- **Web Development**: HTML, CSS, Bootstrap, Tailwind CSS, React, Node.js, Spring Boot, Express.js
- **Database Management**: MySQL, MongoDB
- **Software Development**: Agile, Git/GitHub, API Development, Azure Boards, Selenium
- **Networking & Security**: TCP/IP, Firewalls
- **Cloud & DevOps**: Firebase
- **UI/UX Design:** Figma
- **Mobile Development**: Android Studio

LANGUAGES

- English (Basic)
- Sinhala (Fluent)

👤 About Me

- I am an enthusiastic and driven undergraduate student pursuing a BSc (Hons) in Information Technology at SLIIT, with a keen interest in graphic design and web development. With a strong foundation in HTML, CSS, JavaScript, Angular, React, and the MERN stack, I am passionate about creating innovative and user-centric designs that enhance the digital experience.

🎓 Education

- **BSc (Hons) in Information Technology**
  Sri Lanka Institute of Information Technology (SLIIT)
  2022-2026
- **G.C.E Advanced level**
  Panadura Balika Maha Vidyalaya
  2021(2022)

⚙️ Projects

- **DIY Craft Skill Sharing & Learning (Group project)** March-April 2025
  A project developed using Spring Boot, React, and MongoDB for the 3rd-year, 1st-semester PAF module. The app allows users to share and learn DIY craft skills. I worked on the Like and Comment feature, where users can add, edit, and delete comments, and like posts. Only the original user can update or delete their own comments. This helped improve user interaction on the platform.

- **Academic Schedular (Group project)** Feb-April 2025
  A MERN stack project (MongoDB, Express.js, React.js, Node.js) developed to manage academic schedules for students and lecturers. The system supports CRUD operations for classes, events, and assignments. I was responsible for developing the lecturer management features, which included adding, updating, and viewing lecturer schedules. The system provides a clean interface and real-time updates to support better academic planning

- **Employee-Management-System (Group project)** July-Nov 2024
  A MERN stack-based project developed for the 2nd-year, 2nd-semester ITM module, featuring CRUD operations, advanced search, salary assignment, leave request management, and automated report generation for efficient workforce administration. Built with MongoDB, Express.js, React, and Node.js for seamless data handling and an intuitive user experience.

- **Food Recipe App (Individual project)** Jan-Feb 2025

  CookCraft – Food Recipe App
  A MERN stack-based food recipe app built using MongoDB, Express.js, React, and Node.js, enabling users to add, update, delete, and search recipes, save favorites, and manage personalized collections with user authentication for a seamless experience.

🎖️ Certificates

- **Front-end web development** Jan - 2025
  Faculty of Information Technology,
  University of Moratuwa
  Skills: jQuery · AJAX · Angular · JavaScript

- **Web Development - 1** Nov - 2024

  Faculty of Information Technology,
  University of Moratuwa
  Skills: HTML · Cascading Style Sheets (CSS) · JavaScript
